## Safety Information & Payment Agreement

As a valued customer, we want you to know how to properly use propane. It is a flammable fuel that may explode if not properly handled. For your safety, propane has an odor added so you can detect leaks. If anyone in your household is unable to recognize propane odor, ask us for a scratch and sniff brochure to demonstrate the odor. Propane is heavier than air and will collect at floor level.

### Observe the Following if you Smell Gas:

1. Put out all smoking materials and any other open flames.
2. Do not operate any appliances, switches or thermostats.
3. Get everyone outside and away from the gas equipment.
4. Shut off the gas supply, using the shut-off valve at the tank or cylinder.
5. Call your propane supplier from your neighbor's phone if gas smell is present.
6. Stay outside and leave the gas off until the leak has been found and fixed.

**Restoring Service and Relighting Your Pilots:** If your propane tank was empty when your delivery was made, then for safety reasons, your tank supply valve was shut off at the tank. This valve must be turned back on and your pilots relit to restore service. This should only be done by qualified personnel. We strongly recommend that for safety reasons, you call our office or another qualified technician to restore service and relight the pilots. However, if you relight the pilots yourself, 1) turn all appliance controls and manual shut-off valves to the "OFF" position, 2) slowly open the tank supply valve, 3) carefully smell for the presence of propane at floor level and low spots before attempting to relight the pilots, 4) if gas is detected, STOP and follow the above instructions, 5) follow the manufacturer's instructions for pilot lighting.

**Be Aware of Improper Functioning Gas Appliances.** Carbon monoxide can be produced by a propane gas appliance that is not functioning properly. The flame on your appliance should always burn bright blue. If the appliance produces a lazy yellow or orange flame, have it checked by a professional. In addition, always make sure that your appliances are vented properly and that there is a good supply of fresh air available.

**\*All invoices are due within ten (10) days of delivery.\***

Thirty (30) days after delivery any unpaid portion of "charge" sales are subject to a Finance Charge of 1-3/4%, minimum of \$.50 – Annual Rate 21%.

In case of default, Purchaser agrees to pay all reasonable costs of collection and attorney fees, not to exceed 15% of unpaid debt.
